

# LEDECOLIGHTING

CREATING A SMARTER & BRIGHTER FUTURE

## 2021 Product Guide

Since 2007

Innovative Energy Efficient LED Lighting Solutions

[www.ledecolighting.com.au](http://www.ledecolighting.com.au)

## ABOUT US

LED ECO LIGHTING have been involved in the electrical and lighting industry for over 35 years, predominantly in the supply and installation of electrical and lighting products. We have used this knowledge and experience to bring you a range of quality LED lighting products that are both stylish and simple to install. We are always working to expand and improve our product range to give you the very best LED products available.

## OUR PRODUCTS

Specializing in the LED industry for over 12 years, we have become leaders in this field. With strong partnerships with many manufacturing facilities, this allows us to have unparalleled product diversity and control over our manufacturing processes. This gives us the ability to provide a high quality product at a competitive price to our customers.

## OUR CONSULTANTS

We can show you the many advantages of LED lighting technology over conventional lighting systems. We can also help with product selection and design so the LED product is matched to best suit your needs. We carry a wide range of LED products to suit any lighting application in domestic to commercial and industrial.

## OUR LIGHTING DESIGN SERVICE

We are able to offer our customers a customised lighting design service for those projects where specific lighting levels are required, taking the guess work out and giving total piece of mind.

## OUR WEBSITE

Our website allows users to login, view specials, download product brochures, view information about us, and use our power consumption and payback calculator plus much more.

Visit us at : [ledecolighting.com.au](http://ledecolighting.com.au)

## OUR WARRANTY

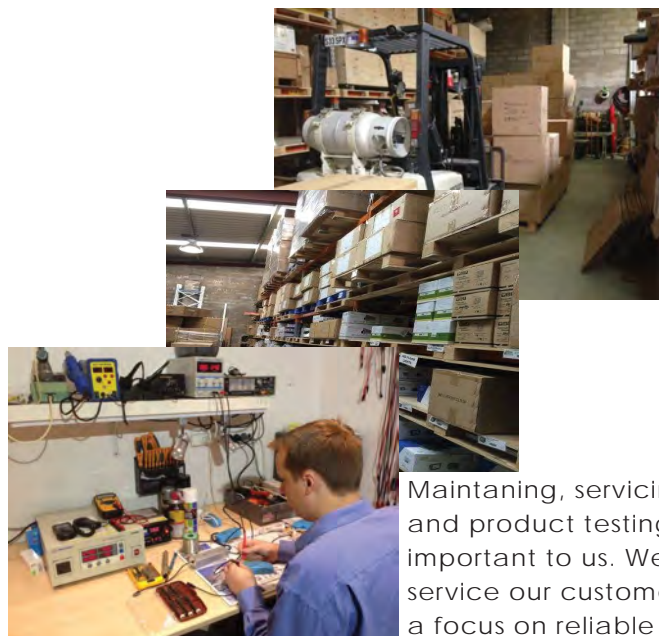

### Warranty Certificate

LED Eco Lighting offer a replacement warranty against a product that is defective from workmanship or material for a period of up to 5 years. The product must be used under normal operating conditions from the date of purchase on the following LED lighting products in the range. LED down light fittings, LED shop lighters, LED Garden Lighting, LED Track Lighting, LED flood lighting, LED strip Lighting, LED Up lighter fittings, LED street light fittings, LED power supplies, LED fluro tubes, LED lamps, LED Drivers, LED light controllers. Some conditions may apply to operating hours for some products.

**Exclusions:** Product alterations or modification, misuse, improper installation, opening or removing external covers, any accident or mishandling of the product. Any electrical power surges, power spikes and any other external factors affecting its correct operation. This will be determined at the discretion of the company.

## OUR SERVICE

Maintaining, servicing and product testing is important to us. We can service our customers with a focus on reliable service and quality products. We can also provide product installation service if required.

## LIGHTING TERMS EXPLAINED

### Relationship between lux and lumens

One Lux is defined as being equivalent to one lumen spread over an area of one square metre. Lumen only takes into account the light intensity in a specific direction, where as Lux takes into account the area also.

### Light measurement devices

Lumens (luminous intensity) is measured within a spherical devise that can determine colour temperature and luminous intensity as shown in the picture to the right. Lux can be measured by a small hand held device called a Lux meter as shown on the right. Devices used to measure Lumens and Lux are very different.

Lumen Measurement Device

### Requirements for determining lux levels

When determining the Lux light levels in a room, the mounting height and room dimensions must be considered to determine Lux Levels. Lux is an efficient measurement for determining what we see as the brightness. If the light output is focused on a small area, we see this as very bright light. If the light output is wide beam over a larger area, this is considered a weaker light. So we use reflectors and optics to control the path of light, for desired beam pattern with a minimum light loss and greater efficiency.

Example : 500 lumens, in an area of one square meters, gives us intensity of 500 lux.

The same 500 lumens, spread over ten square meters, produces a dimmer illuminance of only 50 lux.

### Lumen depreciation of the light source

Lumen depreciation is a process of the gradual decline in light output that is observed from most light sources over time due to gradual filament or electrode deterioration of the lamp.

### The relationship of lumens & watts

Wattage (Watts) is the power required to operate a light fitting. It refers to the total electricity that is consumed which will include:

- The heat generated by the light depending on the type of lighting device.
- The energy of the light emitted from the light.

So the rated wattage of a light source refers to the entire power consumed to drive the source and there is no relationship between lumens or lux.

LUX Meter

# Colour Temperature Explained

Colour temperature is a characteristic of visible light that has important applications in lighting, photography, videography, publishing, manufacturing, astrophysics, horticulture, and many other fields.

Colour temperature is defined as a numerical value to the colour emitted by a light source, measured in degrees of Kelvin. The Kelvin Colour Temperature scale imagines a black body object -(such as a lamp) being heated.

At some point the object will get hot enough to begin to glow. As it gets hotter its glowing colour will shift, moving from deep reds, such as a low burning fire would give, to oranges & yellows, all the way up to white hot. Light sources that glow this way are called "incandescent radiators" and the advantage of them is that they have a continuous spectrum. This means that they radiate light energy at all wavelengths of their spectrum, therefore rendering all the colors of a scene being lit by them equally. Only light from sources functioning this way can meet the true definition of colour temperature.

In relation to lighting building interiors, it is often important to take into account the colour temperature of illumination. For example, a warmer (i.e. lower colour temperature) light is often used in public areas to promote relaxation, while a cooler (higher colour temperature) light is used to enhance concentration of light in offices, workshops, showrooms, warehousing, shopping complexes, etc .

# ECO1 SMART SETUP PROCEDURE

1

ECO1 SMART CONTROL

The setup procedure for Smart products onto the ECO1 Smart App is very simple. It can be done in a matter of minutes. The simple setup guide below goes through the basic steps to setup various devices on the ECO1 Smart App.

## Setup Procedure for Smart Control Devices

Some of the devices that can be added to the Smart App with this method

## Setup Procedure for Smart Lighting Products

All of the lighting products can be added to the Smart App with this method

1. Select the "ADD" button on the spaces screen
2. Select "Lighting Control" add on the device list
3. Give your device a name and the space location you want it assigned to
4. Open the lighting control on the spaces screen and click on the match button
5. Turn the light off then on, click on the match button then the light will flash to confirm a successful match

## Setup Procedure for Hand Held Remote for Lighting Products

All of the lighting products can be added with this method

1. Select the lamps which are to be group controlled and turn power ON,
2. Switch OFF the power, then back ON again within 3 seconds, quickly press the CH1/ON button once. The selected lamps will flash slowly 3 times to confirm that the lamps are successfully matched or grouped.
3. Repeat the steps above if required for channels 2, 3 and 4 as required.

\*\*\*NOTE : Hand held remote control works independently and the Smart App is not required to dim or change colour temperature if using this hand held remote.

# ECO1 SMART CONTROL

## Features

- ECO1 Smart Control gives you the ability to control your lighting and other devices locally or from anywhere in the world via the gateway controller.
- With ECO1 Smart Control you can adjust colour temperature of the LED lighting from warm light to cool light with ease, with a variable light colour control system.
- Ultra smooth dimming range from 2% to 100% creates the perfect mood for every occasion.
- Lights can be setup in groups or individually so you can set up the lighting to your specific requirements.
- ECO1 Smart Control can also control other devices such as TV's, air-conditioning, curtains and blinds, power sockets, intercom, door locks, garden lighting and much more.
- The Scene feature can control your lighting, TV, air-conditioning, curtains and other ECO1 Smart devices. With the press of a single button you can set up home scenes, out scenes, party scenes and much more.
- Location function can trigger scenes when you are a preset distance from your home or office automatically.
- ECO1 Smart Control can be used in commercial or home application to control any electrical device.
- ECO1 Smart Control can now be connected with Amazon Alexa for even more flexibility in controlling your home or office.
- ECO1 Smart Control is easy to use and simple to setup.

Gateway controller

Gateway controller connection diagram

Smart driver and LED fitting can be connected into any standard wiring system and requires no complex wiring to make it work. Simply plug in and learn into the App or the Smart lighting system can be controlled by the hand held remote, and can be up and running within a few minutes.

| Channel OFF |   |  |

Optional hand held remote control unit

# ECO1 SMART CONTROL GATEWAY

ECO1 Smart Control Gateway is used to link your Smart products with your mobile phone and give you the ability to control your devices locally or via the cloud. The gateway can be connected into any standard router. Simply plug into the router, scan the IR code on the gateway from the Smart App on your phone and the gateway is ready to use. It requires no complex connection or programming to make it work, you are now able to control lighting, appliances, TV's and air conditioning locally or from anywhere in the world.

Gateway Controller

Product Code	Input Voltage	Wireless Type
WG-100	5VDC	2.4GHz

\* Power adapter and connecting cables supplied with gateway

Step 1  
Choose add on the spaces page

Step 2  
Choose gateway on the devices page and scan IR code

Step 3  
Name gateway and you are ready to go

# ECO1 SMART IR CONTROL

ECO1 Smart Control Infrared Remote can be used to control your air conditioning, TV's, satellite or cable box, sound systems, Blu-ray player. Infact any product that has an IR remote control can be programmed into the Smart control system consolidating all your remote controls into your mobile phone. The 360° technology means you dont need to point the IR remote at the device you want to control it just needs to be in line of sight. Simply plug in the power adapter and select and learn the device into the Smart IR Controller.

# ECO1 SMART CONTROL RGBW CONTROLLER

The ECO1 Smart RGBW Colour Changing Controller is the ideal device for controlling LED low voltage strip light. It can control RGB colour changing strip light and also control color temperature variable strip or even single colour strip light or both, all through the ECO1 Smart App. To setup simply scan the IR code on the back of the RGBW Controller and it is connected to the ECO1 Smart App.

Product Code	Input Voltage	Power rating

# ECO1 HAND HELD REMOTE

The simple Hand Held Remote Control connects directly to the ECO1 lighting products via a simple learn in process and eliminates the need for a gateway and ECO1 App. It can be used in conjunction with the gateway and ECO1 App as an additional way for controlling your lights. The controller features allow you to have four individual switching channels and a master on/off. It also allows you to change colour temperature and dim the lights to create beautiful moods and ambiance to suit your personal taste.

 Dim- Decreases the light intensity.

 CT WW Adjusts the light to a warmer colour temperature.

 CT CW Adjusts the light to a cooler colour temperature.

 ON  
Channel Individual control of channels  
OFF 1, 2, 3 & 4

Control your ECO1 lighting products directly with the hand held remote

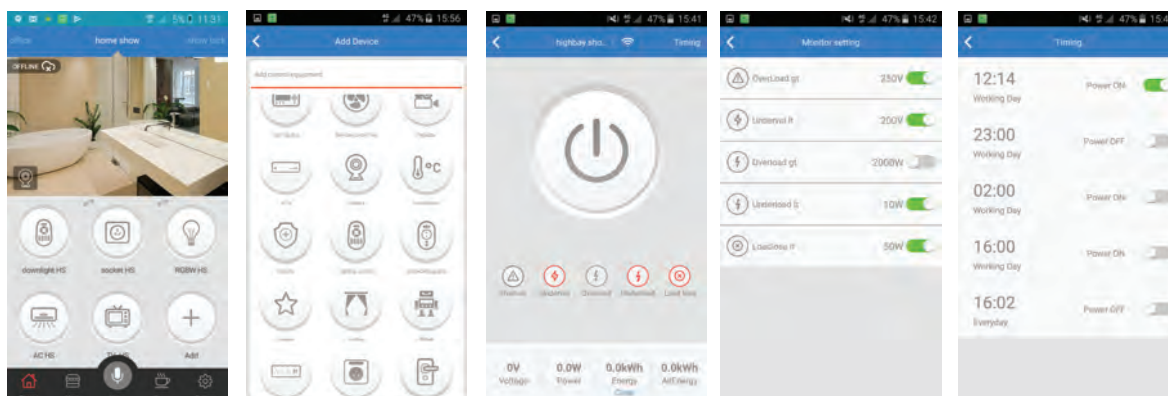

# ECO1 SMART CONTROL SOCKET

ECO1 Smart Control Socket is a 240VAC device that can be plugged into a standard power outlet and can control any electrical device via the ECO1 Smart App on your mobile phone. The socket also has a timing function that allows the user to pre-set the on and off times. The socket is easy to use, simple to setup, and it is also able to display power consumption on the ECO1 Smart App. Some applications include the following uses such as setup your pool pumps on the timer function, turn lamps on and off at preset times for security when you are away, easily isolate standby power on TV's, sound systems, and many other applications. The Smart socket has the ability to control any electrical device or appliance locally or from anywhere in the world via the gateway controller.

Product Code	Input Voltage	Output Current	Wattage (W)	IP Rating	Power Factor	Ambient Temp Range
E1-15	240V AC	10A	2400W	IP20	> 0.90	-40°C~+85°C

ECO1 Smart Control App free download control your lighting from anywhere

Simply plug in and learn into the ECO1 Smart App and it will be up and running within a few minutes.

# DOOR CAMERA/INTERCOM

The ECO1 Smart Intercom/Camera and Door Chime connects via WiFi to the ECO1 Smart App without any wiring required. It is very simple to operate, simply press the external bell button and it rings the indoor chime and also notifies you on your smart phone if you are at home or away. It has a talk and listen function and also record capabilities, comes complete with indoor chime and external doorbell unit and can also be used to operate the ECO1 Smart Lock (see installation instructions for setup procedure).

Product Code	Input Voltage	Battery type	Wireless Type	Lens Angle	Pixels	Internal chime
IDB-120-1	6VDC	4 x AA	2.4GHz	130 Degree	1Mp	85VAC - 265VAC

# ECO1 SMART CONTROL IP CAMERA

The ECO1 Smart IP Camera is the perfect device for monitoring the home or workplace. To set up simply scan the IR code and it is connected to the ECO1 Smart App. The camera can pan and tilt 330° x 120° and also has sound and record capabilities. The Smart IP Camera also has built-in night vision so you can see in the dark. The wireless data transmission feature also makes it simple to install as it only requires power connection for the camera to operate.

Product Code	Input Voltage	Image sensor	Lens Angle	Camera Resolution	Min Light level	Pan/Tilt
IP-360S	5VDC	1/4" Colour CMOS	67°	720p	0.5 Lux	330°x120°

# DDLRCOB DOWNLIGHT SERIES

The DDLR13 is designed with a 60 degree lens for a focussed light output, and is suitable for a range of home or commercial lighting applications. DDLR-COB is available in standard switchable colour temperature or CT series can be controlled via the ECO1 App or Hand Held Remote. This downlight has a ultra smooth variable colour range adjustment from warm white (3000K) to cool white (6000K) depending on the mood required in the room. This fitting also has very smooth dimming range from 2% to 100% to give even further flexibility in lighting control.

Product Code	DDLR13-CT	DDLR13-SW
Voltage (V)	AC100-240V 50/60Hz	
Wattage (W)	13 W	13W
Chip Type	Bridgelux COB chip	
Lumen (Lm)	1100lm	1100lm
Beam Angle	60°	
CRI	>80Ra	
Colour temp	infinitely variable from : Warm White(WW) : 3000K to Cool White(CW) : 6000K (ECO1 CT series only)	
Dimming	Dimmable range 2% -100%	
IP Rating	IP44 Indoor use or under covered areas	
Dimensions	110mm x 53mm	110mm x 53mm
Cutout Size	90 -95 mm	
Face Plate	Available in white, black, brushed chrome, chrome 110mm Diameter	
Weight	380g	380g
Power Factor (Pf)	>0.9	
Certification	CE , ROHS, SAA (others available on request)	
Warranty	3 Years warranty	
Age Testing	48 working hours with intermittent switching	
ECO1 Smart Control features (ECO1 CT series only)	Mesh lighting control feature, control curtains, blinds, intercom, cameras, PIR sensor, Smart socket, IR control, RGBW controller, Door locks scene controller, location control, Amazon Alexa control. See ECO1 Smart Control catalogue for more information.	

Control everything in your home or office from anywhere

## DDL DP DOWNLIGHT SERIES

These general purpose fittings are designed with a robust polycarbonate body for the budget conscious. These fittings are suitable for a range of domestic lighting applications. Suitable for ceilings under 3 metres, this fitting is designed to be installed in a ceiling and covered with thermal insulation. This fitting is also dimmable to give even further flexibility in the lighting control.

Product Code	Voltage (V)	Wattage (W)	Power Factor	Luminous Flux (Lm)	Beam Angle	CRI	Colour temp	Dimmable
DDL P7W	240V AC	6W	>0.85	790	120	>80	3000-6000K	Yes
DDL P10W	240V AC	10W	>0.85	1020	120	>80	3000-6000K	Yes
DDL P10W-SW	240V AC	10W	>0.85	1020	120	>80	3000K, 4000K or 6000K	Yes

**Note :** DDL P10W-SW has colour temperature adjustable via a 3 position switch on the back of the fitting to choose the colour temperature you desire.

## GRILLE REFLECTOR DOWNLIGHTS

These Grille reflector LED downlights consume less power compared with conventional commercial lighting products. At the same time offering high light output, 40,000 + hours life, with excellent light stability and colour render. The reflector Grille downlight is ideally suited to shop lighting where a directional beam of light is required in multiple directions.

Product Code	Voltage (V)	Wattage (W)	Power Factor	Luminous Flux (Lm)	Beam Angle	Cutout size (mm)	Colour temp	Dimmable

AR330	240V AC	90W	>0.85	9300	60	170x 485	3000-6000K	Yes

## DDL10 DOWNLIGHT SERIES

The DDL10 is designed with a 90 degree lens for a focussed light output, and is suitable for a range of home or commercial lighting applications. DDL10 is available in standard switchable colour temperature or CT series can be controlled via the ECO1 App or Hand Held Remote. This downlight has an ultra smooth variable colour range adjustment from warm white (3000K) to cool white (6000K) depending on the mood required in the room. This fitting has a very smooth dimming range from 2% to 100% to give even further flexibility in lighting control.

Product Code	DDL10-CT	DDL10-SW
Voltage (V)	AC100-240V 50/60Hz

# SQUARE DOWNLIGHTS

Our LED square downlight with a range from 10W - 30W has a high light intensity. Suitable for a range of home lighting or commercial applications. This downlight is ideal for domestic or commercial lighting applications where a more architectural style product is needed. The DLQ series is available in standard single colour or the DLQ CT downlight has a variable colour range adjustment from warm white to cool white depending on the mood required in the room. This fitting is also dimmable to give even further flexibility in lighting controlled by the ECO1 Smart App or the Hand Held Remote.

Product Code	DLQ125	DLQ160	DLQ195
Voltage (V)	AC100-240V 50/60Hz		
Wattage (W)	10 W	20W	30W
Chip Type	Epistar SMD2835		
Lumen (Lm)	930lm	1790lm	2745lm
Beam Angle	120°		
CRI	>80Ra		
Colour temp	infinitely variable from : Warm White(WW) : 3000K to Cool White(CW) : 6000K (ECO1 CT series only)		
Dimming	Dimmable range 2% -100%		
IP Rating	IP44 Indoor use		
Material	Aluminium housing		
Cutout Size	125 mm x 125mm	160mm x 160mm	195mm x 195mm
Face Plate	Available in white finish

Control everything in your home or office from anywhere

The Hand Held Remote can be used for local wireless control only available for DLQ CT Series

## SLIMLINE DOWNLIGHT SERIES

Slimline LED recessed 12W to 24W high output light fittings are ideal in commercial lighting applications where there is limited space in the ceiling to mount standard lighting. These slimline downlights are available in standard single colour temperature or ECO1 Smart Control App controlled or Hand Held Remote. This downlight has an ultra smooth variable colour range adjustment from warm white (3000K) to cool white (6000K) depending on the mood required in the room. This fitting has a smooth dimming range from 2% to 100% to give even further flexibility in lighting control.

# SLIMLINE DOWNLIGHT SERIES

2

DOWNLIGHT SERIES

The slimline LED recessed downlight 10W to 18W fittings are ideal for general lighting. They are also ideal in commercial lighting applications where there is limited space in the ceiling to mount standard lighting. These slimline downlights are available in standard switchable colour temperature or the CT series can be controlled via the ECO1 App or Hand Held Remote. This downlight has an ultra smooth colour range adjustment from warm white (3000K) to cool white (6000K), depending on the mood required in the room. This fitting has ultra smooth dimming range from 2% to 100% to give even further flexibility in lighting control.

Product Code	SLR180	SLR210	SLR235	SLR280
Voltage (V)	AC100-240V 50/60Hz			
Wattage (W)	10 W	13W	16W	18W
Chip Type	Epistar SMD2835			
Lumen (Lm)	930lm	1210lm	1440lm	1620lm
Beam Angle	120°			
CRI	>80Ra			
Colour temp	infinitely variable from : Warm White(WW) : 3000K to Cool White(CW) : 6000K (ECO1 CT series only)			
Dimming	Dimmable range 2% -100%			
IP Rating	IP44 Indoor use			
Material	Aluminum housing + PMMA light guide			
Cutout Size	160 mm	180mm	220mm	280mm
Face Plate	Available in white or silver

The Hand Held Remote can be used for local wireless control available for SLR CT series only

## MINATURE DOWNLIGHT SERIES

Miniature LED downlight fittings are so small that they can fit into places where it is not possible for conventional light fittings to fit. Their low heat generation make them safe to use in confined spaces. These fittings can be used for under bench lighting, kitchen bench top lighting, stair tread lighting, pathway lighting and many architectural applications. Now with the ECO1 Smart App and the RGBW Controller we can dim and setup other colour changing functions.

Product Code	Voltage (V)	Wattage (W)	Luminous FLux (Lm)	LED Chip Type	Beam Angle	Cutout size (mm)	Colour temp	Dimmable

# DDLS12 DOWNLIGHT SERIES

The DDLS12 is designed with a robust aluminium finish. This fitting is suitable for a range of home or commercial lighting applications. Suitable for ceilings under 3 metres. The DDLS12 is a single colour option standard downlight. The DDLS12CT can be controlled by the ECO1 Smart Control App or Hand Held Remote. This fitting has ultra smooth variable colour range adjustment from warm white (3000K) or cool white (6000K) depending on the mood required in the room. This fitting also has a very smooth dimming range from 5% to 100% to give even further flexibility in lighting control.

Product Code	DDLS12 , DDLS12CT
Voltage (V)	AC100-240V 50/60Hz
Wattage (W)	12 W
Chip Type	Epistar SMD2835
Lumen (Lm)	1210lm max
Beam Angle	120°
CRI	>80Ra
Colour temp	DDLS12CT infinitely variable : (WW) : 3000K to (CW)6000K DDLS12 available in 3000K,4000K or 6000K
Dimming	Dimmable range 5% -100%
IP Rating	IP44 Indoor use
Dimensions	110mm x 47mm
Cutout Size	95 mm
Face Plate	Available in white or silver finish (Standard) 110mm Ø
Weight	380g
Ambient temp	-30°C~+75°C
Carton size	40 pcs @ 58 x 47 x 25 cm (carton weight) 20Kg
Power Factor (Pf)	>0.9
Certification	Australian standards , EMC
Warranty	3 Years warranty
Age Testing	48 working hours with intermittent switching
Smart Control features (DDLS12CT only)	Mesh lighting control feature, control curtains, blinds, intercom, cameras, PIR sensor, Smart socket, IR control, RGBW controller, Door locks scene controller, location control, Amazon Alexa control See ECO1 Smart Control catalogue for more information

## DLC900 DOWNLIGHT SERIES

The DLC900 Series is designed to give a high intensity focussed beam of light. This fitting is suitable for home or commercial lighting applications. The DLC900 switchable has a colour temperature selectable switch 3000K, 4000K and 6000K or the DLC900CT is controlled by the ECO1 Smart Control App or Hand Held Remote. This downlight has ultra smooth variable colour range adjustment from warm white (3000K) to cool white (6000K) depending on the room ambience required. Also with a very smooth dimming range from 5% to 100% giving further flexibility in lighting control.

Product Code	DLC900A-CT DLC900C-CT	DLC900B-CT DLC900D-CT	DLC900A-SW DLC900C-SW	DLC900B-SW DLC900D-SW
Voltage (V)	AC100-240V 50/60Hz			
Wattage (W)	12W			
Chip Type	Bridgelux COB			
Lumen (Lm)	960lm			
Beam Angle	45°			
CRI	>80Ra			
Colour temp	infinitely variable from: (WW)3000K to (CW)6000K		colour temp switchable 3000K, 4000K, 6000K	
Dimming	Dimmable range 2% -100%		Dimmable	
IP Rating	IP20 Indoor use			
Dimensions	84 x 70/95mm	105 x 70/98mm	84 x 70/95mm	105 x 70/98mm
Cutout Size	70/76 mm	90mm	70/76 mm	90mm
Face Plate	Available in white, black, brushed chrome, chrome 84mm, 88mm diameter or 105mm diameter			
Weight	380g			
Packaging size	110w x 110d x 120 h (individual packaging)			
Carton size	20 pcs @ 63 x 27 x 25 cm (carton weight) 10Kg			
Power Factor (Pf)	>0.9			
Certification	EMC , SAA (others available on request)

# DDLE10 DOWNLIGHT SERIES

The DDLE10 is designed with a robust aluminium finish. This fitting is suitable for a range of home or commercial lighting applications. DDLE10-SW has a colour temperature changing switch in the back and the DDLE10CT can be controlled by the ECO1 Smart Control App or Hand Held Remote. The DDLE10CT has an ultra smooth variable colour range from warm white (3000K) or cool white (6000K) depending on the mood required in the room. This fitting also has a very smooth dimming range from 5% to 100% to give even further flexibility in lighting control.

Product Code	DDLE10-SW DDLE10CT
Voltage (V)	AC100-240V 50/60Hz
Wattage (W)	10 W
Chip Type	Epistar SMD2835
Lumen (Lm)	980lm max
Beam Angle	120°
CRI	>80Ra
Colour temp	DDLE10CT infinitely variable : (WW) : 3000K to (CW)6000K DDLE10-SW switchable colour temp 3000K,4000K,6000K
Dimming	Dimmable range 5% -100%
IP Rating	IP44 Indoor use
Dimensions	108mm x 36mm
Cutout Size	85 -95 mm
Face Plate	Available in white, black, brushed chrome, chrome (Standard) 108mm ø
Weight	380g
Ambient temp	-30°C~+75°C
Carton size	50 pcs @ 58 x 47 x 25 cm (carton weight) 20Kg
Power Factor (Pf)	>0.9
Certification	Australian standards , EMC , IC-4
Warranty	3 Years warranty
Age Testing	48 working hours with intermittent switching

## DL1720 DOWNLIGHTS

This high power downlight fitting utilises the latest LED Chip technology to give a very high lumen output together with low power consumption. Its compact size allows it to fit in place of a standard downlight with a 92mm cutout. Superior heat dissipation properties and high quality LED driver makes this downlight fitting very reliable. A great choice for any commercial lighting application.

Product Code	Voltage (V)	Wattage (W)	Power Factor	Luminous Flux (Lm)	Beam Angle	Cutout size (mm)	Colour temp	Dimmable
DL1720CW	240V AC	20W	>0.85	2160	130	90	6000 (CW)	Yes
DL1720NW	240V AC	20W	>0.85	2100	130	90	5000 (NW)	Yes
DL1720WW	240V AC	20W	>0.85	1980	130	90	3200 (WW)	Yes

Note : Lights are available in silver or white finish

## DL200 DOWNLIGHT SERIES

The DL200 series is designed for commercial lighting applications and projects where higher lighting levels are required. With anti glare diffuser, no Mercury, no UV light and excellent light stability and colour rendering options. DL200 series is available in standard colour temperature, switchable or CT series can be controlled with ECO1 Smart Control or Hand Held Remote. This downlight has an ultra smooth variable colour range adjustment from warm white (3000K) to cool white (6000K) depending on the mood required in the room. This fitting has a very smooth dimming range from 2% to 100% to give even further flexibility in lighting control.

Product Code	DL20020	DL20028	DL20038
Voltage (V)	AC100-240V 50/60Hz		
Wattage (W)	20 W	28W	38W
Chip Type	Epistar SMD2835		
Lumen (Lm)	1800lm	2240lm	3440lm
Beam Angle	120°		
CRI	>80Ra		
Colour temp	infinitely variable from : Warm White(WW) : 3000K to Cool White(CW) : 6000K (DL200 CT series only)		
Dimming	Dimmable range 2% -100%		
IP Rating	IP44 Indoor use or under covered areas		
Material	Aluminium housing + PC lens		
Cutout Size	200mm - 215mm		
Face Plate	Available in white, black, brushed chrome		
Weight	1100g		
Packaging size	23.5x 23.5 x 9cm		
Carton size	48x49x49cm 20pcs 24KG		
Power Factor (Pf)	>0.9		
Certification	CE , ROHS, SAA ,ICF(others available on request)		
Warranty	3 Years warranty		
Age Testing	48 working hours with intermittent switching		
ECO1 Smart Control features (DL200 CT series only)	Mesh lighting control feature, control curtains, blinds, intercom, cameras, PIR sensor, Smart socket, IR control, RGBW controller, Door locks scene controller, location control, Amazon Alexa control. See ECO1 Smart Control catalogue for more information.		

The Hand Held Remote can be used for local wireless control and available for DL200 CT series only

# SHOPLIGHT SERIES

These LED Shoplighters have low power consumption. With a life span of more than 40,000 hrs, these shop lights produce no thermal radiation or UV rays, compared to traditional shop lights. Available in standard single colour temperature or CT series can be controlled with ECO1 Smart Control or Hand Held Remote. This Shoplight has an ultra smooth variable colour temperature adjustment from warm white (3000K) to cool white (6000K) depending on the required lighting in the room and a very smooth dimming range from 2% to 100% giving more flexible lighting control.

Product Code	SLB15038 SLB15038-CT	SLB15045 SLB15045-CT
Voltage (V)	AC100-240V 50/60Hz	
Wattage (W)	38W	45W
Chip Type	Samsung SMD 5630 chip	
Lumen (lm)	3800lm	4500lm
Beam Angle	120°	
CRI	>80Ra	
Colour temp	infinitely variable from : Warm White(WW) : 3000K to Cool White(CW) : 6000K (Shoplighter CT series only)	
Dimming	Dimmable range 2% -100%	
IP Rating	IP20 Indoor use Dry Environment	
Material	Aluminium frame + Glass lens	
Cutout Size	220 x 130 mm	
Finish colour	Available in white or silver	
Weight (each)	2 kg	
Packaging size	25x16x15cm	
Qty Carton	8pcs per carton (individual packaging boxes)	
Power Factor (Pf)	> 0.9	
Certification	CE , ROHS, SAA (others available on request)	
Warranty	3 Years warranty	
Age Testing	48 working hours with intermittent switching

## 38W ROUND SHOP LIGHTERS

This LED shop lighter replaces traditional round 70W and 150W metal halide shoplighters, with lower heat generation, low power and a high lumen output. With stronger spring clamps for easier installation, this shoplighter is the ideal replacement choice.

Product Code	Voltage (V)	Wattage (W)	Power Factor	Luminous Flux (Lm)	Beam Angle	CRI	Colour temp	Dimmable
RSL7038WW	240V AC	38W	>0.85	3200	60	>80	3000 K	Yes

# COMMERCIAL TRACK LIGHTS

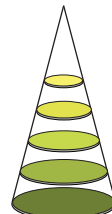

These high power LED track light fittings are designed to replace 70W metal halide track fittings with lower heat generation, low power consumption and a high lumen output. The new architecturally designed housing makes this track light fitting an ideal choice.

Product Code	Voltage (V)	Wattage (W)	Power Factor	Luminous Flux (Lm)	Beam Angle	CRI	Colour temp	Dimmable

## 18W - 22W REFLECTOR DOWNLIGHTS

These reflector LED downlights complete with 60 degree lens provides good light intensity where it is needed. Consuming less power compared with conventional commercial lighting products, but at the same time offering high light output, with excellent light stability and colour render.

Product Code	Voltage (V)	Wattage (W)	Power Factor	Luminous Flux (Lm)	Beam Angle	Cutout size (mm)	Colour temp	Dimmable

# GEN-X 75W - 200W LED HIGHBAYS

75W - 200W LED High Bay fittings are ultra high output with unique heatsink design that increases heat dissipation efficiency. With its phase change radiator technology means this highbay range operates cooler therefore increasing the life span. Coupled with a high quality "MEANWELL" driver and Nichia chip, this ensures the highest quality unbeatable efficiency.

MEANWELL

**Please touch me! !**  
(The temperature is **under 45°C** after 8 hours operation)

Our Phase-change heatsink is specifically designed with special material that dissipates an enormous amount of heat very quickly. The Phase-change heatsink controls the temperature of lamp under 45°C through heat conduction, heat convection, and heat radiation. It allows the LED chips to achieve its highest performance, lower light decay, and long-lifespan.

# GEN-X 75W - 200W LED HIGHBAYS

## FEATURES

### High LM/W LED

Design for high-brightness and low power consumption .

75W = 250W MH

200W

# 80W - 180W UFO HIGHBAYS

80W - 180W LED High Bay fittings are designed with high efficiency heatsink and are IP65 rated. Combined with Phillips lumiled chips and a high quality "PHILLIPS" driver, this ensures the highest quality and cost effective fitting. With an ultra high efficiency of **170Lm/W** makes this the perfect choice for highend lighting applications that require low power consumption and higher light levels.

Product Code	Voltage (V)	Wattage (W)	Luminous Flux (Lm)	Weight (Kg)	CRI	Beam Angle	Colour Temp	Dimmable
HBF80	240V AC	80W	13600	3.45	>80	90°/120°	3000-5000K	Yes Standard

## SURFACE MOUNT DOWNLIGHT FITTINGS

These surface mount downlights with there slimline design with a variety of options including light sensor, motion sensor, power selectable, colour temperature selectable, dimmable and also available in square or round. These fittings are simple and fast to install, either in place of an existing downlight or directly fixed to the ceiling makes this light suitable for a wide range of lighting applications.

Product Code	Voltage (V)	Wattage (W)	Product Discription	CRI	Luminous Flux (Lm)	Colour temp	Dimensions
SmartEdge-18W	240V AC	18W	Single colour non-dimmable	< 80	1600-1900	3000K,4000K or 6000K	220x18
SmartEdge-18W-D	240V AC	18W	Single colour dimmable	< 80	1600-1900	3000K,4000K or 6000K	220x18
SmartEdge-18W-CPTC	240V AC	18W	Switchable colour temp non-dimmable	< 80	1600-1900	Selectable CCT	220x18
SmartEdge-18W-IR	240V AC	18W	Movement sensor non dimmable	< 80	1600-1900	3000K,4000K or 6000K	220x18
SmartEdge-18W-CPIR	240V AC	18W	Switchable colour temp movement sensor non-dimmable	< 80	1600-1900	Selectable CCT	220x18

Spring loaded adjustable mounting clip allows simple and fast installation. Can be installed over an existing downlight hole from 65mm or remove the clips and surface mount directly to the ceiling by simply twisting and locking into place.

Power adjustable

Ambient temperature range -20°C~+50°C

IP54 rating suitable for outdoor covered areas

# SURFACE MOUNT DOWNLIGHT FITTINGS

LED surface mount downlight fittings are a stylish option where there is limited or no ceiling space. A great option if you need to maintain the insulation integrity in the ceiling space. With lower heat generation, low power and high lumen output, makes the ideal choice for replacing traditional halogen fittings.

Product Code	Voltage (V)	Wattage (W)	Luminous Flux (Lm)	Beam Angle	Size	CRI	Colour Temp	Dimmable

## SLIMLINE WEATHERPROOF BATTEN

Slimline weatherproof IP65 light fittings are made with an aluminium base and PC cover making the construction strong and durable and simple to install via a plug in and plug out method. Fittings can be linked together directly with the linking cables that come in various lengths. Designed for easy installation and ideal where slim design and high brightness is required.

Product Code	Voltage (V)	Wattage (W)	Power Factor	Luminous Flux (Lm)	Beam Angle	CRI	Colour temp	Size	Dimmable

STRIP & TUBE LIGHT

Slimline weatherproof IP65 light fittings can be surface mounted or suspension mounted. The specially designed clip system ensures the fitting can not be removed easily. Fittings can be linked together easily with the plug and play system or with the specially designed linking cables that come in various lengths and with the microwave sensor module for auto switching makes this a very versatile fitting.

Step1:  
Screw the mounting  
clip in to position

Step 2 :  
Clip in the fitting and  
install the security screw

Step 2 :  
Fit the power cable and  
turn on the power

**Microwave sensor assembly**

Microwave sensor plugs in directly into the light fitting and can control up to 400W of lights

Connecting cables available in  
20cm, 50cm, 100cm lengths

Cable Connection

Direct connection

Cable Connection on each end of the fitting

## SURFACE MOUNT LINKABLE LIGHT FITTINGS

Surface Mount Linkable light fittings are made with an aluminium base and PC cover making the construction strong and durable. Simple to install via a end to end plug in method, requiring no wiring. Designed for installation in a wide range of uses, this product provides a high light output at 130lm/W ideal for any lighting application.

## LED REPLACEMENT TUBES

Replacement LED light tubes are designed to produce higher light output than conventional T8 fluorescent tubes with half the power consumption. The T8 Series also comes with rotating endcaps for directing light where it is needed. LED tubes come complete with LED starter and can be retro fitted into existing or new fluorescent fittings, also ideal for high usage commercial applications or supplied with prewired fittings to suit LED tubes.

Product Code	Voltage (V)	Wattage (W)	Power Factor	Luminous Flux (Lm)	Beam Angle	CRI	Colour temp range	Life span
T8-600-9W	240V AC	10W	>0.95	1190(CW)	130	> 80	3200-6500K	50,000

# LED FLEXIBLE STRIP LIGHTS

LED flexible strips with their slim design and high brightness are ideal for interior or exterior applications. The small size and flexibility make them ideal for a wide range of lighting solutions. Available in a wide range of colour temperatures, brightness, colours, sizes and CRI to suit any lighting application.

## Selecting correct strip for your application

IP20 strip light has no weather protection coating on the strip so it can only be used in indoor dry applications and is ideal for installing in aluminium profiles of any shape and size for that Architectural high end look (see our aluminium profiles section for more information).

IP63 strip light has a small coating of silicone resin on the front side of the strip. It can be used in indoor and covered outdoor areas. The strip is moisture resistant but if left out in full weather will deteriorate over time. The silicone coating can shift the colour of the strip slightly so it is important to factor this in when selecting a colour temperature.

IP68 strip light is fully enclosed in silicone resin making it stronger than standard strip and it is not affected by water. Ideal for outdoors use and can also be fully submersed in water. The silicone coating can shift the colour of the strip slightly so it is important to factor this in when selecting a colour temperature.

Constant Current LED strip allows you to install long runs of strip and reduces the installation time because it only requires a power connection from 1 end with virtually no light loss. This strip is available in 10m and 20m length rolls and a wide variety of colour and brightness.

## Selecting the ideal lumen output strip for your application

### Acent lighting

200 -400 lm/M is ideal for soft illumination for high lighting sculptures, paintings or architectural features, or even outdoor around decking. The 2110 series of strip is ideal for because the high LED quantity means that you can achieve a soft light with no spotting .

### Feature lighting

400 -800 lm/M is ideal for high lighting features in a room such as cove lighting, under stair treads or around kitchen or bathroom cabinets, or even outdoor around decking the 2110 series of strip light is ideal for these applications because the high LED quantity means that you can achieve a soft light with no spotting.

### Room lighting

800 -2000 lm/M is ideal for high brightness light levels for example suspended profile over kitchen island bench, and general room lighting, or even lighting for outdoor areas. The 2835 series of strip light is ideal for the higher light level requirement.

### Commercial lighting

1500 -6000 lm/M is ideal for high light levels or high ceilings for example overhead office lighting, reception counters, hotels, shopping centres, supermarkets etc.. Coupled with our extensive range of aluminium profiles we can create the perfect architectural high end look you need.

### Custom made solutions

We can custom design your lighting requirements and custom make aluminium profiles in house. We can also provide you with a lighting design to suit your lighting requirements making it simple and easy for you or your electrical contractor to install.

# LED FLEXIBLE STRIP LIGHTS

## High Efficiency 3040 strip CRI>80

Product code :	SMD20-3040-4.8-6
Description :	High Efficiency 180lm/W
Voltage :	24 Vdc
Colour temp CCT(K) :	3000K, 4000K, 6000K
IP Rating :	IP20, IP66, IP67
LED Qty/M :	80
Watt/M :	4.8
Lumen P/M :	900 lm Max/M
CRI :	>80

Product code :	SMD20-3040-9.6-6
Description :	High Efficiency 180lm/W
Voltage :	24 Vdc
Colour temp CCT(K) :	3000K, 4000K, 6000K
IP Rating :	IP20, IP66, IP67
LED Qty/M :	160
Watt/M :	9.6W
Lumen P/M :	1728 lm/M Max
CRI :	>80

Product code :	SMD20-3040-19.2-6
Description :	High Efficiency 160lm/W
Voltage :	24 Vdc
Colour temp CCT(K) :	3000K, 4000K, 6000K
IP Rating :	IP20, IP66, IP67
LED Qty/M :	160
Watt/M :	19.2
Lumen P/M :	3072 lm/M Max
CRI :	>80

Product code :	SMD20-3040-34-6
Description :	High Efficiency 150lm/W
Voltage :	24 Vdc
Colour temp CCT(K) :	3000K, 4000K, 6000K
IP Rating :	IP20, IP66, IP67
LED Qty/M :	80
Watt/M :	34W
Lumen P/M :	5100lm Max
CRI :	>80

Product code :	SMD20-2835-6-128-90
Description :	High Efficiency 130lm/W
Voltage :	24 Vdc
Colour temp CCT(K) :	3000K, 4000K, 6000K
IP Rating :	IP20, IP63, IP67
LED Qty/M :	128
Watt/M :	19.2W
Lumen P/M :	2200lm Max
CRI :	>90

## High Efficiency 2835 strip CRI>95

Product code :	SMD20-2835-3-80-95
Description :	High Efficiency 125lm/W
Voltage :	24 Vdc
Colour temp CCT(K) :	3000K, 4000K, 5000K, 6500K
IP Rating :	IP20, IP63, IP67
LED Qty/M :	80
Watt/M :	14.4W
Lumen P/M :	1730lm/M Max
CRI :	>95

## FLEXIBLE LED NEON STRIP

LED flexible neon strip is more attractive and energy-efficient than the old style neon lighting.

The inner flexible PCB and the strong outer flexible body makes this product very reliable, saving up to 80% in power costs compared to neon lighting, creating a uniform light throughout over a very long distance.

The rigid LED neon strip can with stand extreme outdoor factors and saves maintenance costs long term.

With its full-set of accessories, it provides an easy and safe complete installation.

### Features

- Narrow variance of light colour, temperature and light intensity
- Proven circuitry and reliable components, maintain consistent light brightness and colour uniformity.
- Constant current available in up to 30m metres with no light loss
- Slim and durable narrow design out performs neon lighting
- Surface constructed from fire-retardant resin helps resist fire hazard and unfavourable climatic conditions.

Product Code	Voltage (V)	Wattage (W)	IP Rating	Size	front face	Dimmable
NF1480	24V DC	9.6W/M	IP66	4mm(W)x8mm(H)	Rounded/Square	Yes
NF6511	24V DC	8.6/14.4W/M	IP66	6.5mm(W)x11mm (H)	Rounded/Square	Yes
NF1010	24V DC	8.6/14.4W/M	IP66	10mm(W)x10mm(H)	Rounded/Square	Yes
NF1010-RGB	24V DC	14.4W/M	IP66	10mm(W)x10mm (H)	Rounded/Square	Yes

Note : Can only be dimmable by using ECO1 system or AL3600RC, AL3200RC

4mm x 8mm square face only

6.5mm x 11 mm square face or rounded face available

10mm x 10mm square face or rounded face available

## RIGID LED NEON STRIPS

LED ECO LIGHTING, LED neon-system is more attractive and energy-efficient than the old style neon lighting. The inner LED hard PCB and the strong outer PC body makes this product very reliable, saving up to 80% in power costs compared to other neon lighting, creating a uniform light throughout over a very long distance. The rigid LED neon strip can with stand extreme outdoor factors and saves maintenance costs long term. With its full-set of accessories, it provides an easy and safe complete installation.

### Features

- Narrow variance of light colour, temperature and light intensity
- Proven circuitry and reliable components, maintain consistent light brightness and colour uniformity.
- Up to 10 metres with no light loss
- Slim and durable narrow design out performs neon lighting
- Surface constructed from fire-retardant resin helps resist fire hazard and unfavourable climatic conditions.

Product Code	Voltage (V)	Wattage (W)	IP Rating	Chip Type	Beam Angle	Material	Operating temp	Dimmable
N124W-RED	12V DC	4W/M	IP67	3528 SMD	180	UV resist PC	-40°C to 60°C	Yes
N124W-GREEN	12V DC	4W/M	IP67	3528 SMD	180	UV resist PC	-40°C to 60°C	Yes
N124W-BLUE	12V DC	4W/M	IP67	3528 SMD	180	UV resist PC	-40°C to 60°C	Yes
N124W-AMBER	12V DC	4W/M	IP67	3528 SMD	180	UV resist PC	-40°C to 60°C	Yes
N124W-WHITE	12V DC	4W/M	IP67	3528 SMD	180	UV resist PC	-40°C to 60°C	Yes
N124W-RGB	12V DC	4W/M	IP67	3528 SMD	180	UV resist PC	-40°C to 60°C	Yes

Note : Can only be dimmable by using ECO1 Smart system or AL3600RC, AL3200RC

# ALUMINIUM STRIP PROFILES

We carry a huge range of aluminium strip profiles, so you can customise your LED strip lighting application. Add your LED strip cut to the length you require and install it for a fully customised LED lighting application. We can also make you fully custom made linear lights to suit your specific application and all you need to do is install it.

# SMART PANEL LIGHT SERIES

LED Panel Lights have low power consumption. With a life span of more than 40,000 hrs, panel lights produce no thermal radiation or UV rays and the high frequency flicker from LED panel lights is eliminated, compared to traditional tube lighting systems. Controlled by the ECO1 Smart Control App or Hand Held Remote. This panel light has ultra smooth variable colour range adjustment from warm white (3000K) to cool white (6000K) depending on the mood required in the room and a very smooth dimming from 2% to 100% giving more flexible lighting control.

Product Code	MPL120040-CT	MPL60040-CT	MPL120060-CT
Voltage (V)	AC100-240V 50/60Hz		
Wattage (W)	40W	40W	60W
Chip Type	Epistar SMD2835 chip		
Lumen (lm)	4000lm	4000lm	6000lm
Beam Angle	120°		
CRI	>80Ra		
Colour temp	infinitely variable from : Warm White(WW) : 3000K to Cool White(CW) : 6000K		
Dimming	Dimmable range 2% -100%		
IP Rating	IP20 Indoor use Dry Environment		
Material	Aluminum frame + PMMA light guide		
Panel Size	1195x295x10mm	695x295x10mm	1195x595x10mm
Finish colour	Available in white or silver		
Weight (each)	5Kg	5Kg	10kg
Packaging size	126x45x6cm	66x73x6cm	126x66x6cm 5pcs per carton (individual packaging boxes)1
Carton size	28x45x32cm	68x75x32	128x68x32
Power Factor (Pf)	>0.9		
Certification	CE , ROHS, SAA (others available on request)		
Warranty	3 Years warranty		
Age Testing	48 working hours with intermittent switching		
ECO1 Smart Control features	Mesh lighting control feature, control curtains, blinds, intercom, cameras, PIR sensor, Smart socket, IR control, RGBW controller, Door locks scene controller, location control, Google home and Amazon Alexa control. See ECO1 smart control catalogue for more information.		

ECO1 Smart Control App free download control your lighting from anywhere

The hand held remote can be used for local wireless control and available for all Panel lights series

# AIR GRILLE PANEL LIGHT

Air grille panels can be used with our LED premium or standard panel lights. These panels have been designed to fit in a standard 600 x 1200 Grid T-Bar ceiling, coupled with high luminous efficiency and low power consumption, also the constant current driver system gives protection from unstable voltages. With a life span of more than 40,000 hrs, panel lights produce no thermal radiation or UV rays. In addition the high frequency flicker from LED panel lights is eliminated, compared to traditional tube lighting systems.

Product Code	Voltage (V)	Wattage (W)	Air Grille size	Lumen (Lm)	Beam Angle	Colour Temp ( K )	LED panel size	Dimmable
AGLP120040WW	240V AC	40W	595x1195	3370	120	3200 (WW)	295x1195	Optional
AGLP120040CW	240V AC	40W	595x1195	3465	120	5000 (NW)	295x1195	Optional
AGLP120048WW	240V AC	48W	595x1195	4030	120	3200 (WW)	295x1195	Optional
AGLP120048CW	240V AC	48W	595x1195	4100	120	6000 (NW)	295x1195	Optional

NB: other colour temperatures are also available on request

Also available in plaster recess, surface mount, wire suspension and T-Bar ceiling mount

## PRODUCT FEATURES

- Allows retrofit into standard T-Bar 600x1200 ceiling grid
- Air handling for ducted airconditioning systems
- Replaces standard troffer with air handling feature
- Can be ordered in a range of powder coat colour options
- Available in 40w or 48w options

Standard LED Light panel fits into air grille frame shown below

	MLP120040 BEAM ANGLE 120 DEG		
	Distance (M)	Max (lux)	Diameter (M)
	1	1291	2.9
	2	323	5.9
	3	143	8.8
	4	81	11.8
	5	52	14.7

	MLP120048 BEAM ANGLE 120 DEG		
	Distance (M)	Max (lux)	Diameter (M)
	1	1506	2.9
	2	376	5.9
	3	167	8.8
	4	92	11.8
	5	60	14.7

# OUR UNIQUE PANEL FEATURES

Our panels use the highest quality driver to eliminate flicker.

Flicker can easily be seen by putting your mobile phone in photo mode and holding it over an illuminated LED product.

## EFFECTS OF FLICKER FROM LED PRODUCTS

Flicker from LED products is caused by a number of factors such as supply voltage disturbance, type of dimmer, but mostly poor driver design to lower driver cost. This flicker can cause a number of side effects to people working under these lights for prolonged periods of time such as offices, production lines, etc.

Some of these side effects can include:

headache, migraine, tiredness, increased intraocular pressure, blurred vision, neurological problems such as photosensitivity, epilepsy.

Other related hazards could cause :

Visual illusion on spinning machinery, road lighting , monitoring system, TV, scanning system (QR Code)

Our panels 4 Edge lit system  
Excellent uniformity

Other panel products only  
2 edges are lit.

## 4 SIDE EDGE LIT SYSTEM LIGHT UNIFORMITY

Is when there are 4 strips of LED around each side of the panel. Infrared thermography image shows the light output from our 4 edge lit system which produces a very even light output compared to other brands that only use 2 side edge lit systems.

Folded  
edges

## FOLDED BACK PANEL

Our panels use a folded back panel for 2 reasons :

1. To create a stronger panel frame means less flex in the panel and the LED's and the light guide is less likely to move. This movement can cause black spots and upset the light uniformity and even damage the LED chips.
2. The fold in the panel stops light from escaping through the back of the panel. This can also affect the light uniformity of the panel and create discolouration or yellow areas on the edges and corners on the panel.

## NEW WELDED SEAMLESS FRAME PANEL

The new seamless welded frame is not held together by screws or angle brackets. The welded finish creates a more stylish and modern look at the same time creating a stronger frame.

# OUR UNIQUE PANEL FEATURES

## Why is SDCM (standard deviation colour matching) so important ?

As shown in the diagram below LED chip colour variation can vary considerably within the same colour temperature acceptable range.

The **GREEN** diamond shaped area is the maximum colour variation when LED chips are made. Some manufacturers will use this **SDCM** for their products resulting in very poor uniformity and colour variation, even between the products from the same batch order.

The **GREY** oval shaped area is the acceptable **SDCM** that most manufacturers will use to select the led chips for their batch/product order making each batch order the same however, on reorder the colour temperature will most likely be different and will be noticeable when installing second batch order with the first batch order.

The **BLUE** square area is the area selected for our panels. This **SDCM** means that the panels will have excellent colour consistency but more importantly means that if you need to reorder for a previous project you can be assured that the colour will be the same even if the orders are years apart.

## Fixed Bin Code System

Our Fixed bin code system for light source selection ensures a greater consistency in colour temperature of finished panels. Our panels use a SDCM of less than 5K in different batches, so you get the same CCT colour for every order with no visible variation in light colour between multiple batch orders.

### 4014 LED chip Package

Our LED chips are made in house which enables a greater control over chip quality and uniformity

UGR is short for Unified Glare Rating. It measures psychological parameters of subjective discomfort to eyes caused by light from lighting devices in indoor visual environment. The values can be calculated by the regulation condition with CIE unified glare value formula.

## OTHER PRODUCT FEATURES

1. PMMA light-emitting panel provides excellent uniformity and purity of greater than 90%
2. Lower decay of 3000 hours, lumen maintenance is 98.7%
3. Isolated driver means there is no direct electrical connection between input circuit and output circuit for increased safety

## SLIMLINE 10W-30W LED FLOOD LIGHTS

LED Flood fittings are high brightness with low cost. Supplied with a 1m flex and plug makes them a great plug and play option. The slimline design, built in driver and robust construction makes them ideal for any outdoor environmental conditions. The Movement sensor model is also ideal for security lighting applications.

Product Code	Voltage (V)	Wattage (W)	Luminous Flux (Lm)	Beam Angle	CRI	IP Rating	Colour Temp	Dimmable
FLB-10	240V AC	10W	950	120	>80	IP65	3000K or 6000K	No
FLB-10MS	240V AC	10W	950	120	>80	IP65	3000K or 6000K	No
FLXB-20	240V AC	20W	1900	120	>80	IP65	3000K or 6000K	No
FLB-20MS	240V AC	20W	1900	120	>80	IP65	3000K or 6000K	No
FLXB-30	240V AC	30W	2800	120	>80	IP65	3000K or 6000K	No
FLB-30MS	240V AC	30W	2800	120	>80	IP65	3000K or 6000K	No

Available in : black or white finish 10W, 20W and 30W are available with motion sensor

10w Size: W130 x H96 x D30 mm

20w Size: W200 x H135 x D38 mm

30w Size: W168 x H228 x D38 mm

## SLIMLINE 50W-150W LED FLOOD LIGHTS

LED Flood fittings are high brightness with low cost. Supplied with a 1m flex and plug makes them a great plug and play option. The slimline design, built in driver and robust construction makes them ideal for any outdoor environmental conditions. The Movement sensor model is also ideal for security lighting applications.

Product Code	Voltage (V)	Wattage (W)	Luminous Flux (Lm)	Beam Angle	CRI	IP Rating	Colour Temp	Dimmable
FLB-50	240V AC	50W	4700	120	>80	IP65	3000K or 6000K	No
FLB-50MS	240V AC	50W	4700	120	>80	IP65	3000K or 6000K	No
FLB-100	240V AC	100W	9000	120	>80	IP65	3000K or 6000K	No
FLXB-150	240V AC	150W	13500	120	>80	IP65	3000K or 6000K	No

Available in : black or white finish 50W, 100W and 150W is available with motion sensor

50w Size: W250 x H160 x D50 mm

100w Size: W250 x H160 x D50 mm

150w Size: W360 x H237 x D75 mm

# GEN-X 20W-50W LED FLOOD LIGHTS

LED Flood fittings have an ultra high brightness with lower power consumption compared with other LED floods on the market. The robust aluminium housing with 5mm transparent toughened glass face make it the ideal choice for any environmental condition. LED Flood fittings can be widely used in a large variety of outdoor applications where a wide beam spread is required.

Product Code	Voltage (V)	Wattage (W)	Luminous Flux (Lm)	Beam Angle	CRI	IP Rating	Colour Temp	Dimmable
FLX20P	240V AC	20W	2700	120	>80	IP65	3000K/5000K	No
FLX30P	240V AC	30W	4200	120	>80	IP65	3000K/5000K	No
FLX50P	240V AC	50W	6800	120	>80	IP65	3000K/5000K	No

## COMPARISON BETWEEN GEN-X LED FLOODS AND STANDARD LED FLOODS

**NEW 20W GEN-X Flood = Standard 40w LED Flood**

**NEW 30W GEN-X Flood = Standard 50w LED Flood**

**NEW 50W GEN-X Flood = Standard 70w LED Flood**

# GEN-X 75W-135W LED FLOOD LIGHTS

LED Flood fittings have an ultra high brightness with lower power consumption compared with other LED floods on the market. The robust aluminium housing with 5mm transparent toughened glass face, make it the ideal choice for any environmental condition. Flood fittings can be widely used in a large variety of outdoor applications where a wide beam spread is required.

Product Code	Voltage (V)	Wattage (W)	Luminous Flux (Lm)	Beam Angle	CRI	IP Rating	Colour Temp	Dimmable

## 240W - 480W LED SPORTS LIGHTS

The 240W - 480W LED sports light fitting with various size lenses enables the light beam to be focused as required to eliminate overspill and increase light intensity and focuses the light where the light is required. The slimline design allows for easy installation. Coupled with a high quality "MEANWELL" driver and "PHILLIPS" chip ensures the highest quality and long life.

Product Code	Voltage (V)	Wattage (W)	Luminous Flux (Lm)	Weight (Kg)	CRI	Beam Angle	Colour Temp	Ambient Temp Range
FA-X2-240W	240V AC	240W	27,600	12	>80	30/60/100	4000-6000K	-30°C~+50°C
FA-X3-360W	240V AC	360W	41,400	16	>80	30/60/100	4000-6000K	-30°C~+50°C
FA-X4-480W	240V AC	480W	55,200	20	>80	30/60/100	4000-6000K	-30°C~+50°C

FEATURES - IP65 rated for outdoor use - 5 year warranty - high quality driver and chip - Australian safety approved

## 720W - 960W LED SPORTS LIGHT

The 720W - 960W LED sports light fitting with various size lenses enables the light beam to be focused as required to eliminate overspill and increase light intensity and focuses the light where the light is required. The slimline design allows for easy installation. Coupled with a high quality "MEANWELL" driver and "PHILLIPS" chip ensures the highest quality and long life.

Product Code	Voltage (V)	Wattage (W)	Luminous Flux (Lm)	Weight (Kg)	CRI	Beam Angle	Colour Temp	Ambient Temp Range
FA-X6-720W	240V AC	720W	82,800	32	>80	30/60/100	4000-6000K	-30°C~+50°C
FA-X8-960W	240V AC	960W	110,400	40	>80	30/60/100	4000-6000K	-30°C~+50°C

FEATURES - IP65 rated for outdoor use - 5 year warranty - high quality driver and chip - Australian safety approved

## 300W - 1000W LED SPORTS LIGHTS

The 300W -1000W LED sports light fitting with various size lenses enables the light beam to be focused as required to eliminate overspill and increase light intensity and focuses the light where the light is required. The slimline design allows for easy installation . Coupled with a high quality "MEANWELL " driver and "PHILLIPS" chip ensures the highest quality and long life.

Product Code	Voltage (V)	Wattage (W)	Luminous efficiency	Weight (Kg)	CRI	Beam Angle	Colour Temp	Ambient Temp Range
FL300W	240V AC	300W	160Lm/w	18	>70	15/30	3000-6000K	-30°C~+50°C
FL400W	240V AC	400W	160Lm/w	18	>70	15/30	3000-6000K	-30°C~+50°C
FL500W	240V AC	500W	160Lm/w	18	>70	15/30	3000-6000K	-30°C~+50°C
FL600W	240V AC	600W	160Lm/w	18	>70	15/30	3000-6000K	-30°C~+50°C
FL700W	240V AC	700W	160Lm/w	18	>70	15/30	3000-6000K	-30°C~+50°C
FL800W	240V AC	800W	160Lm/w	30	>70	15/30	3000-6000K	-30°C~+50°C
FL900W	240V AC	900W	160Lm/w	30	>70	15/30	3000-6000K	-30°C~+50°C
FL1000W	240V AC	1000W	160Lm/w	30	>70	15/30	3000-6000K	-30°C~+50°C

### FEATURES

- Philips Lumiled chips and Meanwell driver
- IP65 rated for outdoor use
- 5 year warranty
- high quality driver and chip
- Australian safety approved

## LED STREET LIGHTS

LED Street light fittings are high brightness with low power consumption. The robust aluminum housing has a specifically designed lens to evenly distribute the light along a roadway or pathway. The driver is designed to maximise light output and energy efficiency making this street light fitting the ideal choice for any street lighting application.

# PREMIUM PANEL LIGHTS

LED Panel Lights have high luminous efficiency and low power consumption also coupled with constant current driver systems giving protection from unstable voltages. With a life span of more than 40,000 hrs, panel lights produce no thermal radiation or UV rays. In addition the high frequency flicker from LED panel lights is eliminated compared to traditional tube lighting systems.

# INGROUND UPLIGHTERS

This high power, high brightness 12W to 24W inground uplighter is available in spot or frosted glass. These fittings produce 1200- 2400 lm. The integrated thermal design has excellent heat dissipation and extended life. The high impact tempered glass front and patented cable water proofing design eliminates water or moisture intrusion, making this fitting very robust and is ideal to be installed in harsh environments. Perfect for use in any indoor, outdoor or submersible applications.

Product Code	Voltage (V)	Wattage (W)	IP Rating	Lumen (Lm)	Beam Angle	LED Chip Type	Material Type	LED Qty
SUL112	12/24V DC	12W	IP68	1200	10/20/40/60	CREE	316 Stainless	12

SSM124	24V DC	24W	IP67	2400	10/20/40/60	CREE	Cast Alloy	24

Note : all garden lighting can be controlled and dimmed with ECO1 smart system or other controllers available.

Ask us for a package solution

## GARDEN STEP LIGHTS

This surface mount step light with a modern and stylish design is ideal for use on steps, pathways and any indoor or outdoor decorative lighting application. The patented cable water proofing design eliminates water or moisture intrusion and the 316 stainless steel makes this fitting very robust and ideal to be installed in harsh environments.

Product Code	Voltage (V)	Wattage (W)	IP Rating	Lumen (Lm)	Beam Angle	LED Chip Type	Material Type	LED Qty

Cutout 505l x 60w

## OUTDOOR OYSTER LIGHT FITTINGS

The surface mount round and rectangular oyster light has a modern and stylish design. Ideal for use in any indoor or outdoor areas and also suitable for wall and ceiling mounting or any decorative lighting application. The cast aluminium base and polycarbonate cover makes this a robust and durable fitting.

Product Code	Voltage (V)	Wattage (W)	Power Factor	Luminous Flux (Lm)	Dimensions	CRI	Colour temp	Dimmable

## OUTDOOR BOLLARD

Outdoor Bollards are ideal for a range of applications constructed from aluminium and polycarbonate makes this product suitable for all weather condition applications. can be fitted with a range of 240VAC led lamps or conventional lamps and can be easily modified for low voltage applications.

Product Code	Power input	Lamp Base	IP Rating	Max Power (W)	Dimensions	Material Type
GB14100	240VAC	BC	IP54	60W	(L)1000mm X (D) 140mm	Aluminium + PC

Note : all garden lighting can be controlled and dimmed with ECO1 Smart control or AL3600RC, AL3200RC ask us for a package solution

# RECHARGEABLE WORK LIGHT

LED portable work lights are constructed from robust cast aluminium. This work light is mercury free, environmentally friendly, with a high light output and long life lithium removable battery. LED work lights are low maintenance and operate on a safe working voltage, with no connecting cables and comfortable carry handle make it very portable. These work lights come complete with a 240v AC charge adaptor & car charger included. In addition the battery has a dimming function which extends the battery life to 24 hours of run time and also has USB charger outlet built in.

# RECHARGEABLE 360° POST LIGHT

LED portable 360 degree post lights are constructed from robust cast aluminium, are mercury free environmentally friendly with a high light output and long life lithium battery. With 360 degree light output it is ideal for construction sites, party lighting, camping and many other uses. LED post lights are low maintenance and operate on a safe working voltage, with no connecting cables and comfortable carry handle make it very portable. These post lights come complete with a 240v AC charge adaptor and the battery has a dimming function which extends the battery life to 12 hours of run time.

# RGB LED CONTROLLERS

The AL3600RC multi function controller can provide multiple colour changing options, preset scene control, dimming and speed control. The AL3600RC is a stand alone device or can be used inconjunction with the AL3060 expansion module to allow the controller to control an unlimited number of LED modules. This multifunction controller can be controlled via the onboard key pad or via the remote control unit supplied with the controller.

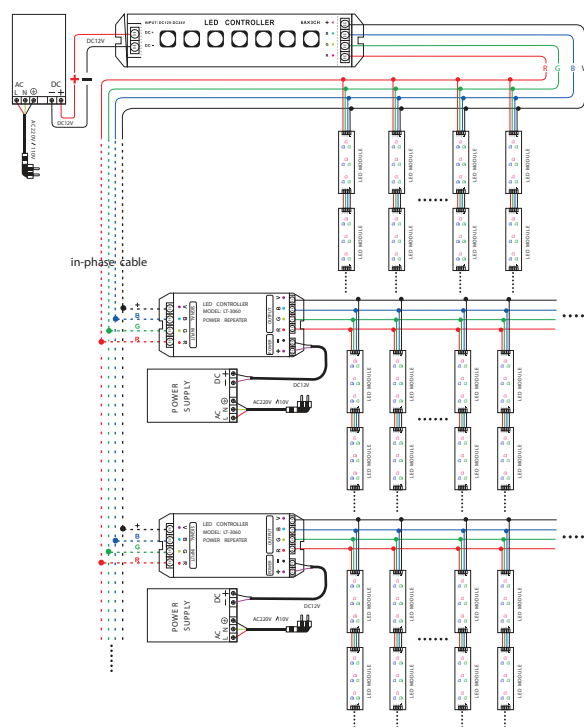

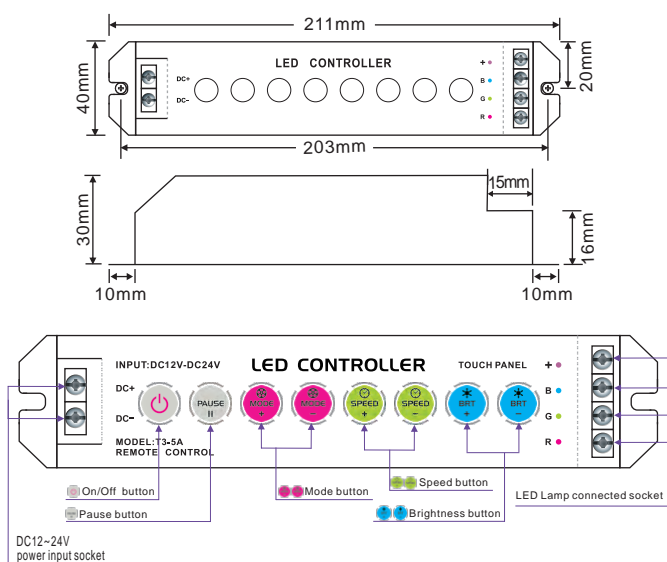

ProductCode	AL-3600RC
Input Voltage	12 - 24V DC
Output Current	6A x 3CH
Output Power	216W/432W(12V/24V)
Control Distance	30 Metres Max
Weight	290g
Ambient Temp Range	-20°C~+50°C
Colour change modes	32 fixes modes, 8 DIY modes)
Control output	single colour,color temp, RGB
Package size	L265 x W36 x H44

Short press: Switch 8 kinds of mode types;  
Long press: Switch 4 kinds of mode directions.  
ON/OFF(Long press, the buzzer can be on or off)  
Mode+/Mode-  
Speed+/Speed-  
BRT+/BRT-  
Scene-mode key

IR Remote Control

Repeaters are All Connected to Controller in Parallel.

# HAND HELD REMOTE CONTROLLERS

11

LED CONTROLLERS

This range of LED controllers operate via global 2.4GHZ RF wireless transmission technology. The modules are able to control colour temperature, dimming functions and RGB colour changing control. The control system consists of two parts, the RF remote control and the receiver. This system allows 1 controller to control an unlimited number of receiver modules and is capable of controlling a wide range of LED lighting products.

## Touch Slide RF Remote Control

SC-1  
Dimming Controller

SC-2  
CCT Controller

SC-3  
RGB Controller

- magnetic mounting plate • Ultra sensitive slider • 0% -100% smooth dimming.
- RF 2.4G, 30m remote distance • 3VDC CR2032 battery.

## Classic RF Remote Control

RC-1  
Dimming Controller

RC-2  
CCT Controller

RC-3  
RGB Controller

RC-5  
RGB+CCT Controller

- Sensitive touch wheel. • group controllable • LED indicator light • 4 zone.
- 0.5% -100% smooth dimming. • RF 2.4G, 30m remote distance. • 3VDC (2 x AAA) battery.

## Slimline RF Remote Control

SRC-1  
Dimming Controller

SRC-2  
CCT Controller

SRC-3  
RGB Controller

SRC-5  
RGB+CCT Controller

- Sensitive touch wheel. • 1 zone • can be set for group control.
- 0.5% -100% smooth dimming. • RF 2.4G, 30m remote distance. • 3VDC CR2032 battery.

# LED CONTROLLERS

The receivers can be controlled by a range of hand held remotes, which enables you to control multiple zones by one remote with endless receivers in each zone and synchronize. Each receiver can be controlled by 10 remotes. The remote control range is up to 30m, with controller's auto-transmitting function to achieve control distance up to 30 metres.

## Constant Voltage Receiver

Product Code	Input Voltage	Output Current	Output Power
CR-CV1	5-36VDC	1CH, 8A/CH	1x(40-388)W
CR-CV2	12-24VDC	2CH, 5A/CH	2x(60-120)W
CR-CV3	12-24VDC	3CH, 4A/CH	3x(48-96)W

Product Code	Input Voltage	Output Current	Output Power
CR-CV4	12-24VDC	4CH, 3A/CH	4x(36-72)W
CR-CV5	12-24VDC	5CH, 3A/CH	5x(36-72)W

Product Code	Input Voltage	Output Current	Output Power
CR-CV1-15	12-24VDC	1CH, 15A/CH	1x(180-360)W
CR-CV2-8	12-24VDC	2CH, 8A/CH	2x(96-288)W
CR-CV3-6	12-24VDC	3CH, 6A/CH	3x(72-144)W
CR-CV4-5	12-24VDC	4CH, 5A/CH	4x(60-120)W
CR-CV5-5	12-24VDC	5CH, 5A/CH	5x(60-120)W

## Constant Voltage Repeater/ Amplifier

Product Code	Input Voltage	Output Current	Output Power
PR-CV1	5-36VDC	1CH, 15A/CH	1x(75-540)W
PR-CV3	12-36VDC	3CH, 6A/CH	3x(72-216)W
PR-CV4	12-36VDC	4CH, 5A/CH	4x(60-180)W

Product Code	Input Voltage	Output Current	Output Power
PR-CV5	12-24VDC	5CH, 5A/CH	5x(60-120)W

# GU10 SPOT LAMPS

12

SPOT LAMPS

GU10 5W to 8W LED spot lamps replace halogen lamps from 20W to 50W without the need to replace the downlight fixture when used in conjunction with our GU10 flex and plug makes converting easy. Their high light output with a low power consumption, make them the ideal choice for lamp replacement in existing fixtures.

Product Code	Voltage (V)	Wattage (W)	Power Factor (Pf)	Luminous Flux (Lm)	Beam Angle	Chip Type	Colour Temp (K)	Dimmable
GU105CW	240V AC	5W	>0.85	440	60	Bridgelux COB	6000K	Yes

## MR16 LAMP KITS

MR16 lamp kit comes complete with a LED driver. The lamp kit replaces halogen lamps from 20W to 50W without the need to replace the downlight fixture, but still allows the flexibility for dimming and flicker free light output. The high light output and low power consumption makes them the ideal choice for halogen downlight replacement in existing fixtures.

Product Code	Voltage (V)	Wattage (W)	Power Factor (Pf)	Luminous Flux (Lm)	Beam Angle	Chip Type	Colour Temp	Dimmable
MR166DCW	240V AC	6W	>0.85	480	60	Bridgelux COB	6000 (CW)	Yes
MR166DWW	240V AC	6W	>0.85	500	60	Bridgelux COB	3200 (WW)	Yes
MR168DCW	240V AC	8W	>0.85	660	60	Bridgelux COB	6000 (CW)	Yes
MR168DWW	240V AC	8W	>0.85	640	60	Bridgelux COB	3200 (WW)	Yes

\*Kit comes complete with LED drivers

# MR16 SPOT LAMPS

MR16 LED spot lamps is available in 6W and 8W to replace halogen lamps from 20W to 50W without the need to replace the downlight fixture. Their high light output with a low power consumption make them the ideal choice for lamp replacement in existing fixtures.

Product Code	Voltage (V)	Wattage (W)	Power Factor (Pf)	Luminous Flux (Lm)	Beam Angle	Chip Type	Colour Temp	Dimmable
MR166CW	12V AC	6W	>0.85	495	60	Bridgelux COB	6000 (CW)	No
MR166WW	12V AC	6W	>0.85	470	60	Bridgelux COB	3200 (WW)	No
MR168CW	12V AC	8W	>0.85	660	60	Bridgelux COB	6000 (CW)	No
MR168WW	12V AC	8W	>0.85	640	60	Bridgelux COB	3200 (WW)	No

Suitable for most halogen downlight transformers

MR166

MR168

## CORN LAMPS

LED corn lamps are the ideal replacement for mercury vapour, metal halide and CFL lamps in highbays or street light fittings. With a lumen output of over 100lm/W these lamps can provide all the light output and energy efficiency required at a fraction of the replacement cost of the complete fitting. These lamps can be supplied with ES (E27) or BC (B22) lamp bases to suit any application and also have a built-in high quality Sunon fan to help maintain a low core temperature.

Product Code	Voltage (V)	Wattage (W)	CRI	Luminous Flux (Lm)	Beam Angle	Chip Type	Colour Temp	Dimmable
C20	240V AC	20W	>80	2600	360	EPISTAR SMD	3000-6000K	No

## LED BATTEN LIGHT FITTINGS

We carry a range of LED batten fittings specifically designed to take LED tubes so there is no need to do any wiring modifications to standard fluoro battens. Simply install the LED batten fitting then fit the led tubes to the new batten fitting.

Product Code	Voltage (V)	Recommended LED tube	No. Tubes Required	Dimention's	Pre wired for LED tubes
BB118	240V AC	T8-600-9W	1	61.6 x 5.5 x 8.6	Yes
BB136	240V AC	T8-1200-18W	1	125 x 5.5 x 8.6	Yes

DB236	240V AC	T8-1200-18W	2	125 x 9.6 x 9.1	Yes

# WATERPROOF LED BATTEN FITTINGS

This range of waterproof LED batten fittings are ideal for use outdoors in high impact or vandal resistant polycarbonate fitting areas and are specifically designed to take LED tubes. There is no need to do any wiring modifications to fluoro battens, simply install the LED batten fitting then fit the led tubes to the batten fitting, so maintenance is simple. Comes complete with fitting and tubes complete.

Product Code	Voltage (V)	Light Source	No. Tubes Required	IP Rating	Dimintions	Pre wired with LED tubes
WP118	240V AC	1 x 9W Tube	1	IP65	66 x 10.5 x 11	Yes
WP136	240V AC	1 x18W Tube	1	IP65	127.5 x 10.5 x 11	Yes
WP218	240V AC	2 x 9W Tube	2	IP65	66 x 15 x 11	Yes
WP236	240V AC	2 x18W Tube	2	IP65	127.5 x 15 x 11	Yes

# SOLAR LED STREET LIGHTS

Solar powered integrated LED Street light fittings are designed for easy installation. The solar panel, lithium battery, controller and LED light is integrated in the fitting so all that needs to be done is bolt it to a pole and you have an instant solar powered street light. This product comes in a range of various sizes and light outputs and is designed and manufactured to suit the lighting application.

1. Material: Die casting aluminum+ Aluminum Alloy
2. Solar Panel: 18V 60W (Monocrystalline silicon solar cell)
3. Led Lamp Power: Bridgelux Chip 20W
4. Battery: Lithium LiFePO4 battery 12.8V 18Ah
5. Lamp angle adjustment , 30°~150°
6. Install height: 5-6M
7. Lumen: 2400 LM
8. Charge time: 6 hours
9. Discharge time: Full power : 10 hours
10. Saving model : 3-5 rainy days
11. Frame color : blue, grey or customized
12. LED light source type : SMD
13. Size : 108 x 37 x12.5cm
14. Weight : 11.15KG

\*\*\* PIR SENSOR OPTION ALSO AVAILABLE SAVING POWER WHEN NO ONE IS AROUND \*\*\*

# SOLAR LED STREET LIGHTS

Latest technology in solar powered LED Street lighting eliminates the need for a battery to store the power, instead it uses the latest technology in super capacitor design to power the LED street light. This has many advantages over conventional solar power lighting such as a 50 year super capacitor life span, maintenance free, chemical free and in addition super capacitors are stable and reliable. The solar LED street light, comes in a range of various sizes, configurations and light outputs and is designed and manufactured to suit the lighting application.

## Features:

- Material: Steel frame + Aluminum Alloy
- Solar Panel: 80W (Monocrystalline silicon solar cell)
- LED Lamp Power: Phillips 8W - 100W
- Battery: Super Capacitor 1,800,000F 30,000 cycles super stable power system
- The lamp angle adjustment, 30° - 150°
- Install height: 4 - 8M
- Lumen: 800 - 10,000 Lm
- Charge time: fast charge, 365 day charging system
- Discharge time: Full power : Adjustable up to 15 hours
- Saving model : continues to charge even on rainy days
- Frame color : hot dip galvanised pole and frame
- LED light source type : SMD

## High Efficiency Solar Panel

- Design life span more than 25 Years
- Class A solar panel cell
- Safe stable and reliable

## Super Capacitor Energy Storage

- Life span >50 Years
- No maintenance required
- Environmentally friendly
- Chemical free
- Safe to store and transport

## LED Outdoor light source

- Life span >50,000 hours
- Type 2 photometric parameter
- Waterproof and good heat dissipation
- Lens Refraction efficiency >95%

## Intelligent Controller

- Life span 12 years
- Long distance monitoring
- Selectable switching control

## Super Capacitor Box

- Waterproof
- Easy installation

## Advantages of Super Capacitors:

- High Working Temperature -40°C~60°C, this range can keep the street lamp working normally in extreme temperature environments and continues to operate normally on rainy days
- The resistance of super capacitor has low discharge range width down to 0 volts which allows it to work normally during any weather conditions
- Super long life span maintain normal temperature 30,000 charge & discharge cycles for 365 days of lighting can be achieved with the intelligent control system.
- Super capacitor is an energy storage device not a chemical reaction as are batteries therefore making them a highly stable device.

# LED DRIVERS

Our range of LED drivers are designed to suit our product range of downlights and other LED products. All our drivers are Australian approved and come complete with flex and plug and have a 3 year warranty.

Product Code	Input Voltage	Input Current	Wattage (W)	Output Voltage	Output current	Output wattage

## Features:

- Leading edge or trailing edge dimmable
- Short circuit protection
- Overload protection
- 3 Year Warranty
- Supplied with Australian flex and plug
- Australian C tick and Safety compliance

# POWER SUPPLIES

We carry a full range of power supplies for any product that requires a step down transformer to operate from 12v to 24v in a range of power ratings. The power supplies are also available in higher voltage ranges, waterproof and non waterproof . All power supplies are transformerless switchmode power supplies which means greater efficiency. All our power supplies are Australian approved.

Product Code	Input Voltage	Output Voltage	Output Current	Wattage (W)	IP Rating	Power Factor	Ambient Temp Range
P1224	240V AC	12V	2A	24W	IP20	> 0.90	-10°C~+60°C
P1260	240V AC	12V	5A	60W	IP20	> 0.90	-10°C~+60°C
P12120	240V AC	12V	8.5A	102W	IP20/IP65	> 0.90	-10°C~+60°C
P12220	240V AC	12V	18.3A	220W	IP20/IP65	> 0.90	-10°C~+60°C
P2424	240V AC	24V	1A	24W	IP20	> 0.90	-10°C~+60°C
P2460	240V AC	24V	2.5A	60W	IP20/IP65	> 0.90	-10°C~+60°C
P24120	240V AC	24V	5A	120W	IP20/IP65	> 0.90	-10°C~+60°C
P24220	240V AC	24V	9.2A	220W	IP20/IP65	> 0.90	-10°C~+60°C

Note : Other power supply voltages, IP65 and IP67, power ratings and dimmable power supplies also available on request

## Features:

- Enclosed case, water resistant.
- Overload protection, constant current Limiting, reset: auto recovery.
- Short-circuit proof, 100% full load burn-in test.
- Built-in EMI filter, low ripple noise.
- Flex and plug to suit Australian conditions.
- Simple primary hook-ups, class 2 outputs.
- No minimum load, no load balancing and no dip switches.
- Proven reliability, robust housing.
- Limited warranty of up to 3 years.
- Waterproof power supplies also available
- High output power supplies also available

## LED ACCESSORIES

We carry a wide range of accessories to suit LED products, from strip connectors to adaptor plates. We can also offer a range of customised options to suit your specific application.

Flexible LED Strip Inline Joiners

Power supply connectors

Low voltage weatherproof and non weatherproof connecting cables

E27 to E40 adaptors

GU10 Flex and plugs

Cable glands

Stainless steel wire suspension kits

240V power cables

We carry a wide range of adaptor plates to suit our lighting range. Plates are available in silver finish, white finish and custom colours available. Custom made adaptor plates are also available.
